To,
The Director,
AIMS,
Baramati.

SUB: Report of ICT usage in Teaching Learning-Reg.

Name of Teacher: Dr Tanaji Chavan

Respected Sir,

I have received opportunity to teach the course "Personal Financial Planning", Direct Taxation, and Indian Ethos and business Ethics courses for AY 2022-23. In these courses I have used various methods of Experiential learning, Learner Level Assessment, Concurrent Evaluation. The use of ICT is become crucial platform for me while implementing the above methods.

The use of ICT in the following ways:

1. Coursera platform used for advance learners
2. E learn market platform used for business games for financial management students
3. Google classroom for material sharing platform

The outcomes of the ICT usage are as follows:

1. Students got practical exposure of theoretical learning.
2. Student's analytical skill enhance while playing financial games
3. Students able to connect more in classroom
4. Students have taken part actively in the classroom activity.
5. Advanced learners have learned more as per their expectations.

This is learning by doing with ICT Usage.

This is for your kind information and submission only.

Thanking you.

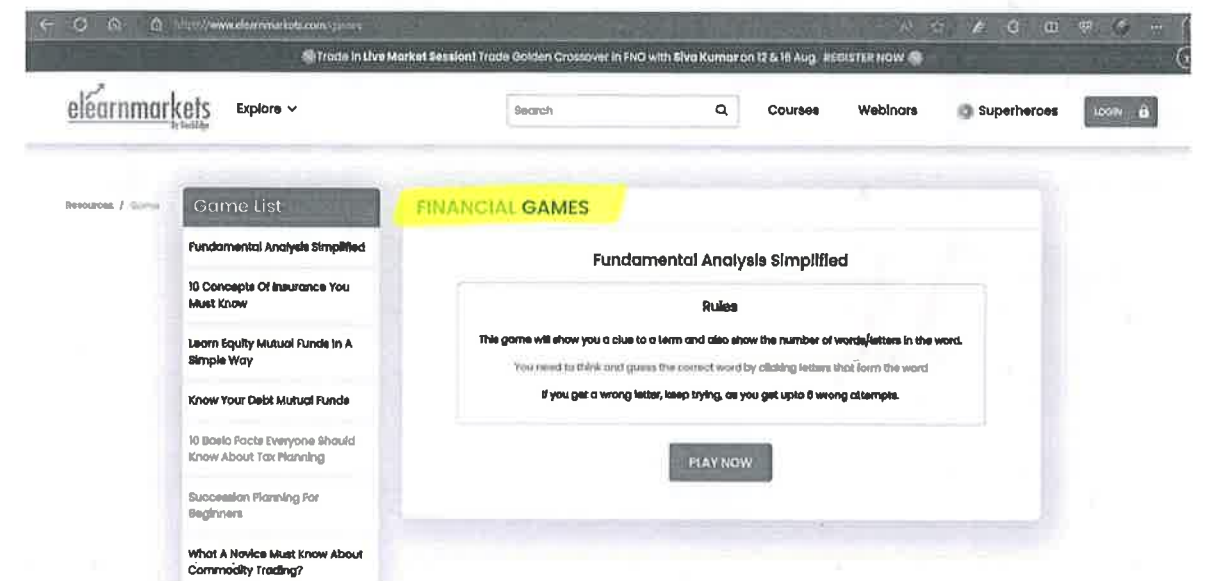

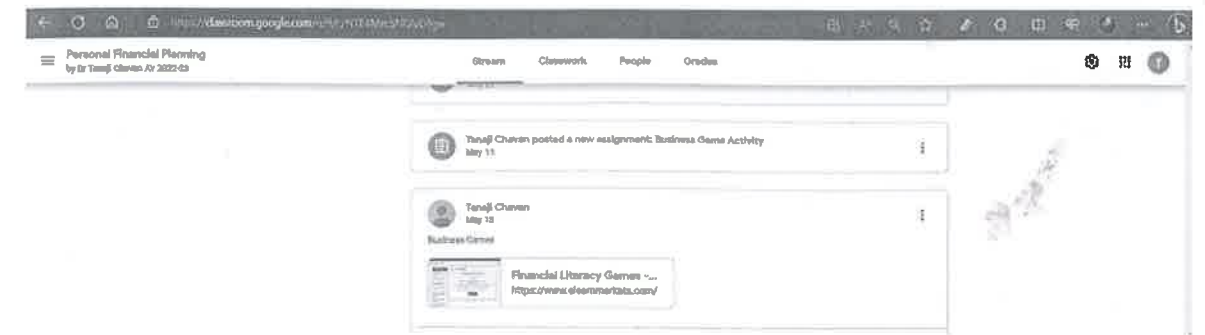

Regards,

Course Teacher- Dr Tanaji Chavan

Welcome back, Tanaji!

You can now create as many learning programs as you need. This is the best way to offer customized content to a specific group of learners. For example, you can now assign a course to a class for credit.
