Students enrolled for the program gave a good response. This can be seen as the average calculated for the variables ranges between extremely good and good. (All Averages are above 4). Though all of the variables are in the above mentioned range, but some of the variables are ranked lower. This indicates that these are the areas which need improvement in future programs. Some of the students felt that the home assignments should have been more interesting and students with an average of 3.64 opined that the number of home assignments for practice should have also been more.
