SUB: **Report of Teaching Learning Methods used -Reg.**
Name of Teacher: Dr Tanaji Chavan
****

Respected Sir,

I have received opportunity to teach the course Financial Modeling, Personal Financial Pllaning, and Indian Ethos and Business Ethics. The Sessions have planned as per the OBE based CIE format. The MOOCs have pllaned for this course. The ICT integration in the teachin learning enhanced the connect among the students as well as teacher students bonding sghthened. The use of Institute MIS and Google classrooms have created for material sharing and assesment.

This experiential learning achieved with following activities.

1. Participation in **MOOCs** for Financial Modelling
2. Organinsed Financial **Games** in the Class of Personal Financail Planning
3. Conducted professional **certification test** for lerner level identification of the course Personal Financail Planning
4. Shared the numerical **problems** with Google classroom for the class Personal Financail Planning
5. Shared the Unitwise **notes** for each students.

These methods with lectures and tutorials have benifial to connect the students and received satisfactory resuls in terms of passing the examinations.
This is for your kind information and submission only.

Thanking you.

Regards,

Course Teacher-
Dr Tanaji Chavan

Enclusures:

  i.   Copies of MOOCs sharing
  ii.   Learner Level Certification
  iii.   Gamification
  iv.   MS Excel Templets Shring
  v.   CV Templets Shring
  vi.   Solved Problems Shring
  vii.   Presentations Notification

Learner Level Assessment
While entering in the learning for Personal Financial Planning, Teacher wants to know the level of understanding about the course.
This test will help teacher to identify the Top 10 and Bottom 10 learners.
Top Learner will be considered as Advanced Learner and Bottom students will be considered as Slow Learners and separate Teaching methodology will be adopted for them.

Numerical Problems

a. Mr M invested 12,500 at 3.5% interest compounded monthly. Calculate th

4.7 Years. $FV = PV \left(\left[1 + (2/m) \right]^{m \times n} \right)$ Ans   12671

b. Calculate the EMI for loan amount of Rs 15,00,000 with rate of interest 10

of 7 Years. $EMI = PR \left(\frac{(1+2)^n}{(1+2)^n - 1} \right)$ Ans $\rightarrow$ 24,875

c. Mrs Seema wants to have Rs 30,00,000 for her daughter's wedding after 1

much she should invest per year considering the inflation rate is at 9%?

$PV = \not{P} FV / \left[((1+2)^n - 1) / 2 \right]$ Ans $\rightarrow$ 149171
